eterno[®] Feltect / Feltina

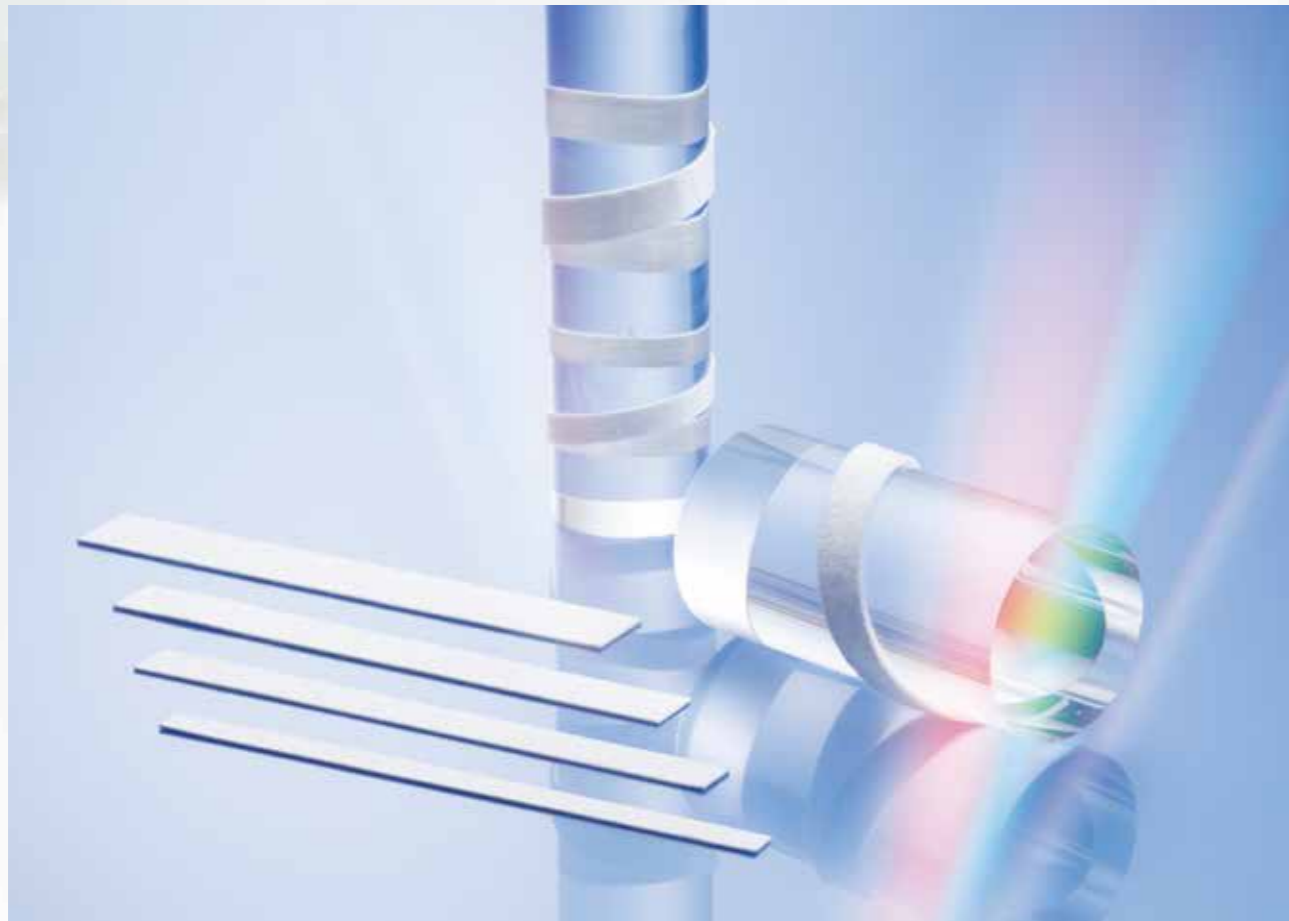

eterno[®] Feltect / Feltina

Polytetrafluoroethylene (PTFE) felt made by the most advanced processing technology.

Excellent biocompatibility with minimal tissue reaction, elution, and degradation.

Developed utilizing CROWNJUN's unique, in-house technology for a truly distinctive felt.

Reduced Fluffing

Multiple inspections ensure that each felt is of the highest quality.

Precise Cutting

Accurate cutting performed by high-precision, automated technology.

Fellect

Strength×High Density

- ◎ 1.0 mm thickness
- ◎ CROWNJUN's unique processing creates a felt that is thin, but strong.

Feltina

Extensibility×Pliability

- ◎ 1.65 mm thickness
- ◎ 1.8 mm thickness
- ◎ The perfect balance of extensibility and softness for a felt that is easy to fit to tissue.

Extensive Line-Up

Depending on the application, various size and thickness combinations are possible. Pre-cut felt saves you valuable time and effort.
